Laboratory Report Notes

Clinical context

Collected during evaluation of elevated blood pressure and headache. This panel shows no acute kidney injury or clinically significant electrolyte disturbance.

Methodology

Sodium, potassium, chloride, carbon dioxide, glucose, BUN, and calcium measured using standard automated chemistry methods. Creatinine measured enzymatically. eGFR calculated using the 2021 CKD-EPI creatinine equation without a race coefficient.

Important note

Reference ranges vary by laboratory and should be interpreted in clinical context. A single result does not establish or exclude a diagnosis.
