

LAKEVIEW FAMILY PRACTICE

Current Medication List

Patient	Elaine Carter	Updated	August 14, 2026
DOB	March 8, 1959	MRN	DEMO-042781

Medication	Dose / route	Schedule	Purpose
Amlodipine	5 mg by mouth	Every morning - Stopped Aug 14	Hypertension
Losartan	50 mg by mouth	Every evening	Hypertension
Atorvastatin	20 mg by mouth	Nightly	Hyperlipidemia
Acetaminophen	500-1,000 mg by mouth	Every 8 hours as needed	Need pain max 3,000 mg/day

Recently changed

Amlodipine 5 mg daily was added at hospital discharge on August 14, 2026. Patient was instructed to track blood pressure and report persistent dizziness, fainting, or new bothersome leg swelling.

On hold

Ibuprofen - avoid unless approved by the treating clinician because NSAIDs may increase blood pressure.

Allergies

No known drug allergies reported.

Medication reconciliation should be completed at every visit. This list is fictional and intended only for an Aurevia product demonstration.
